A.S. Health Science | 2012 - 2016

- Certificate in medical assisting practices
- Prerequisites & elective courses towards B.A.

Skills

Design

User Experience · Visual Design · User Interface · Wireframing · Low-High Fidelity Mockups · Solution Oriented

Research

User Interviews · User Testing · Information Architecture · Journey Mapping · Competitor Analysis · Design Strategy

Software

Figma · Adobe XD · Adobe Photoshop · HTML · CSS · Javascript · Python · Linux · Wacom Tablet · Krita · Gimp (working knowledge)

Visual Design

Branding · Typography · Iconography · Web Design · Colorist · Sketch Artist

Other Skills

Rapid iteration · Cross-functional Collaboration and Communication · Active Listener · Empathy · Presentation Skills · Love for Learning

About

My journey in UX design has been more than just pixels and wireframes; it's been a constant exploration of creating meaningful connections between technology and users. Each project is an opportunity to blend creativity with functionality, and seeing users seamlessly interact with the end product is my goal. Design, for me, is not just a skill set; it's a journey of making the digital world more intuitive, accessible, and aesthetically pleasing. The joy and fulfillment I derive from my work come from the profound impact of solving real-world problems through thoughtful design solutions.
